

## SOLUTION OVERVIEW

# Secure your Campus with One Simple Solution

Each year, budgets get tighter and resources slimmer as your responsibilities grow. In addition to managing your own team, you're responsible for securely onboarding, offboarding, and managing faculty, staff, students, and alumni to ensure their password behaviors don't put your institution at risk.

For higher education institutions, LastPass ensures data is secure and properly managed, enabling everyone to achieve better password habits. LastPass provides a simple and efficient tool for higher education institutions that aids overburdened IT teams in securing access to highly sensitive data and deploying cyber-security initiatives, campus wide.

### Internet2 & LastPass

Together with [Internet2 NET+](#), LastPass offers turnkey, affordable packages designed to make it easy for higher education institutions in the US, to provide secure password management for IT and other academic departments, in addition to providing LastPass to every person on and off campus – students, faculty, and staff.

### Convenient password sharing and collaboration

Secure and flexible sharing for collaborative teams – from IT to the marketing department, even those external to your organization, including students and alumni – all while maintaining accountability. By using generated passwords and revoking access in real time, LastPass ensures that your institution's data doesn't depart each semester with staff and students.

### Frictionless user experience

Keep things simple yet secure. With easy to use web extensions and mobile applications, let LastPass secure access to your data, so your staff and faculty can focus on important initiatives and students can focus on their academics. Users of all levels know exactly where to go, and how to get access. Plus - we know it's not one size fits all. LastPass also offers seamless plug-and-play integrations to customize your experience.

**Secure password management**

**Affordable solution to meet your budget**

**Trusted by your Peers in Academia**

**Comprehensive security controls**

### Digital security for all, on and off campus

Reduce the cyber risk to your institute by securing your employees, students, and their networks! Every individual on and off campus can sign up for a personal LastPass account to ensure a holistic security strategy at your higher education institute. With a private vault that's accessible from any device and browser, there's never an excuse for poor password hygiene.

### Centralized, secure access

With a comprehensive password manager, LastPass provides control for every access point. IT can leverage 100+ custom policies, automated user management, security reporting and more to safeguard every password-protected entry point, while simplifying everyday access. We're uncompromising when it comes to data security, encrypting and decrypting data at the device level so sensitive data is kept secret, even from us.

### Trusted by your Peers

LastPass' password manager is trusted by your peers in Academia. LastPass caters to higher education; with over 1,200 higher education customers and counting, including Harvard University, Duke University, Georgia Technical Institute and more!

### More accessible for every user

LastPass has enabled keyboard navigation, updated proper color contrast and readability, and has added regions and language tags to allow users to navigate with screen readers and keyboards more easily within the vault navigation across three main browsers.

### Features and control businesses require and convenience users expect:

|                                      |  |
|--------------------------------------|--|
| <b>Universal password management</b> | Simplify access to all apps as well as generate and automatically capture, store and fill credentials for any login.   |
| <b>Secure Password Sharing</b>       | Give faculty, staff and students a flexible, safe way to share access to apps without sacrificing accountability or security.                                  |
| <b>Central admin control</b>         | The admin console offers automated user management, a comprehensive adoption dashboard, policies and more that busy IT admins need.                            |
| <b>100+ Security Policies</b>        | Enforce best practices and control password behavior across your higher education institution.   |
| <b>User directory integrations</b>   | Automate onboarding and offboarding, group management and more with AD, Azure AD, Okta, OneLogin or a custom API.  |
| <b>Detailed security reports</b>     | Tie actions to individuals with automated, detailed reporting that helps your organization maintain compliance.  |
| <b>Single sign-on</b>                | With a catalog of 1200+ pre-integrated apps, it's simple for IT to make critical resources accessible to faculty, staff and students in one convenient portal. |
